

PERSON CENTRED PRACTICE

Person-centred practice is based on putting children and young people at the centre of a strong, continual process of listening and learning about what is important **to** and **for** them, now and in the future. You, family, friends and professionals can then act together to support them to get what they want from life.

Person Centred Practice provides you with the opportunity to contribute on equal terms with professionals, sharing the information you have about your child.

Person Centred Practice provides the opportunity for you to be involved in planning for the future with your child

There are lots of different person-centred resources that can be helpful in supporting person centred approaches.

Person Centred Practice allows you to feel **SUPPORTED**.

Person Centred Practice allows you to **QUESTION**.

Person Centred Practice allows you to be **REASSURED**.

Person Centred Practice allows you to **PARTICIPATE**.

Person Centred Practice allows you to be **INVOLVED**.

Person Centred Practice allows you to **CONTRIBUTE**

Person-centred practice puts the child, child's parent or young person at the centre of decisions. You and your child will be supported to understand and participate in the decisions which are taken that affect them. You will be provided with appropriate reassurance, and offered opportunities to raise concerns and have your questions answered.
